

**In addition to our specifications for dry offset label printing, the following parameters apply for the Scent Disc®:**

**Printing**

**Sequence:**

1st colour = silk-screen (e.g. primer printed white background for identical reproduction of colour proof).

2nd - 5th colours = dry offset (standard process colours Y, M, C, K).

6th colour = silk-screen (gloss varnish with encapsulated scent particles).

**Fragrance:**

The surface to which the perfumed coating is applied should occupy an area of at least 15 cm<sup>2</sup>. Bear in mind that the process will cause a slight distortion of the original fragrance and that the coated area will not appear as glossy. A list of all the available fragrances can be obtained on request.
