

- Design:** A CD layer (audio or ROM) adhered to a DVD layer. Total thickness $(1,5 \pm 0,09)$ mm
- Playing time/
Amount of data:** CD layer max. 60 min. audio, respectively 525MB CD-ROM. DVD layer max. 4,7 GB respectively 2.295.000 Sectors.
- Label print:** Silk-screen printing, outside diameter 45 mm, inside diameter 40,5 mm, as DVD 10 and DVD 17. See also DVD print specification 14.
For the DVD plus, one film set is required for each side. The printing of the CD side takes place on the DVD side and vice versa.
- N.B.:** The DVD [plus] can be played on almost all DVD players, with exception of slot-in drives and CD-changers. We therefore strongly recommend that reference to this is written on the label or on the accompanying print documents.
